8-9					Felix Joos "A journey through combinatorics" Lipschitz		
9-10					Anne Driemel "Finding Structure in Curve Data" Lipschitz		
10-11				Jehanne Dousse "Exact and asymptotic enumeration of integer partitions" 2.040			
11-12			Alexey Bufetov "Global asymptotics of stochastic particle systems" Lipschitz				
12-13		Bernhard Schmitzer "Optimal transport: unbalanced extensions and efficient sparse algorithms" Lipschitz				Manuel Gnann "Stability of receding traveling waves for a fourth-order degenerate-parabolic free-boundary problem " Lipschitz	
14-15		Ramiro Lafuente "Homogeneous Ricci flows" Lipschitz		Francesco Ghiraldin "Some recent results on measures arising from variational problems" 2.040			Michael Feischl "Adaptive algorithms, magnetism, and uncertainty" Lipschitz
16-17	Georg Oberdieck "Enumerative geometry of elliptic fibrations and modular forms" Lipschitz				Frau Ruming Zhang "Scattering of waves by periodic structures" Lipschitz
