

PhD Scholarships

at the Berlin International Graduate School in Model and Simulation based Research (BIMoS)

The Berlin International Graduate School in Model and Simulation based Research (BIMoS) offers PhD fellowships for outstanding students holding a master's degree. The research focus of BIMoS will be on the following range of topics:

- (High-Dimensional) Data Analysis
- Inverse Problems- Model Design
- (Discrete) Optimization
- Reduced Modeling from large scale Numerical Simulation

Research will be carried out by ensuring an interdisciplinary collaboration of experts in both theory and application. The PhD program will include a mentoring program as well as a lecture series, summer schools, etc.

Application deadline: May 31st, 2015

Beginning of financial support: October 2015
Duration of support: 3 years
